EDUCATION

Istanbul Technical University

Electronics and Communication Engineering (100% English), GPA: 3.29/4.00
High School Rank: 1st; YKS 2021 Rank: 4262

Maslak, Istanbul
Sep 2021 – Jul 2026

EXPERIENCE

Information Technology CF&HR Long-Term Intern

Mercedes-Benz Türk

Jul 2025 – Jun 2026

Esenyurt, Istanbul

- Coordinated end-to-end IT requests on Jira, working with business users and technical consultants from initial analysis through testing and closure.
- Took part in RPA and AI initiatives aimed at automating repetitive SAP and Jira tracking tasks within the virtual AI team.
- Built Power BI dashboards to monitor response times and support follow-ups for internal system requests.
- Supported KPMG and internal audit activities by gathering evidence, reviewing project records, and assisting with IT governance checks.

Information Technology Business Development Part-Time Worker

VESTEL

Oct 2024 – Jun 2025

Sisli, Istanbul

- Managed IT and software development requests from initial intake to final closure, helping keep business users and technical teams aligned.
- Followed requests through Agile sprints and shared regular progress updates with relevant stakeholders.
- Supported testing by collecting business feedback and following open items until they were completed and closed.
- Helped improve request communication and identified areas where simple automation could make the process smoother.

Information Technology Project Intern

VESTEL

Aug 2024 – Sep 2024

Sisli, Istanbul

- Analyzed ERP processes covering sales, procurement, and collection, then shared process summaries with the team.
- Helped turn business needs into clear action items for IT follow-up and requirement tracking.
- Used Microsoft Office tools to track tasks, prepare meeting notes, and support cross-team follow-ups.

PROJECTS

Machine Unlearning: Analysis & Optimization (MIST) | *Python, PyTorch, Git*

Aug 2025 – Jun 2026

- Developed MIST, a hybrid machine unlearning method that combines SISA's sharded training structure with masked knowledge distillation.
- Evaluated the method against retraining, SISA, and DELETE on image, audio, and video datasets, considering forgetting, retained accuracy, privacy, and runtime.
- Presented the graduation thesis in June 2026; a paper based on this work was accepted for oral presentation at SIU 2026.

BIST 100 Index Prediction | *Python, TensorFlow/Keras, pandas, scikit-learn*

Feb 2025 – Jun 2025

- Built LSTM and GRU models to predict the BIST 100 index at 1-day and 15-day forecasting horizons.
- Prepared financial time series data, trained the models, and evaluated them against a simple baseline.
- Compared actual and predicted values to assess model performance and identify the strengths of each approach.

TECHNICAL SKILLS & INTERESTS

Key Competencies: Machine Learning, Deep Learning, Privacy-Preserving AI, Data Analysis, Financial Time Series Forecasting, BI Reporting, Process Automation

Software & Tools: Python, PyTorch, TensorFlow/Keras, scikit-learn, pandas, SQL, Power BI, Git, Linux, Jira, Google Colab, MATLAB, Simulink, C, SAP, Microsoft Office

Languages: Turkish (Native), English (B2), German (A1)

Interests: Artificial Intelligence, Financial Technologies, Cinema & Film Art, Basketball, Travelling

CERTIFICATIONS

Daimler Truck AG (via EPAM) MBT IT Distinguished Engineering Program: Cloud, API & Microservices, DevSec-Ops, Data/AI/ML, Security & IAM, FOSS

MathWorks MATLAB, Simulink, ML, DL, Statistics, and Control Design Onramps/Courses

LinkedIn Learning Power BI, AI Foundations, Big Data in the Age of AI, Building AI Products, RPA
